What is ACS?

It allows GHG emission reduction projects in developing nations to earn certified Asian Carbon Units and be traded for currency in developed nations which are up-to meet their corporate requirements, individual and national commitments towards global emission reduction targets.

Who we are?

The Asian Carbon Standard Association is a NGO with international partners and members with unique commitment towards Climate Change, Environmental and Social Sustainability.

ACSA developed ACS to provide platform for business, understanding the past failures and to fix the gap between environment, growth, need and responsibility. Thus ACSA focus its future to provide a steam to showcase implementers effort and minimize their loss.

Climate Empowerment Workshop

According to the Climate Initiative Database there are over 200 climate initiatives through which over 18,000 actors are coming together to take specific actions to adapt to climate change. Everyone from governments to organisations recognize their potential in the run up to the next global climate agreement

Global climate actions

France and Morocco's global climate champions have set out their detailed agenda to boost cooperative action between governments, cities, business, investors and citizens to cut emissions rapidly and help vulnerable nations adapt to climate impacts and build their own clean energy, sustainable futures

Global warming

A Global warming is happening now. The planet's temperature is rising. Every one of the past 38 years has been warmer than the 20th century average. The 12 warmest years on record have all occurred since 1998. The hottest year ever recorded for the contiguous United States occurred in 2012.
